

Speaker Introductory Information

Name: Mickey S. Zandi, Ph.D.

Company: [SunGard Availability Services](#)

Position: Managing Director, Consulting Services

Professional Profile

Dr. Mickey Zandi is a recognized international expert in data center design architecture and infrastructure modernization. He helps clients address key issues such as: how to transform, consolidate and reduce the total cost of ownership (TCO) in the data center, and how flexible infrastructure impacts IT operations. Mr. Zandi also helps companies address why they should consider technologies and methods such as Green IT, Cloud, and Utility computing to enhance their IT business value and infrastructure initiatives worldwide.

Mr. Zandi has more than 15 years experience in design and architecture, data center consolidation and transformation, and strategic IT consulting services delivery. He has designed and managed complex IT transformation and data center consolidation projects worldwide in industries such as communications (France Telecom, Equant, C&W), distribution and retail (Coca Cola Enterprises, The Home Depot), education, and banking and financial services. Mr. Zandi is experienced in discovery/assessment of client needs to creation/validation of the application interdependency model to solution design and execution of delivery through on-going operation and proven methodologies.
